Tom,

Based on Mike's response, I will go ahead and start drafting the abbreviated CO memo.

Deb,

As a general rule, we usually include ATSDR costs on all cost recovery efforts for ORC and DOJ requests. Since you plan to close out this site, there's probably no further need to expend resources to obtain ATSDR costs.

Thanks,

Mike

Mike:

From what I've recently learned, whether or not we seek to recover ATSDR's costs depends upon how ATSDR funded its work. If the funds came from grant money, then we would try to recover those costs for them. Do you happen to know if there's any reasonable way to find this out before we have another ICS run to include the costs? Right now we are looking at closing the costs out, unless we happen to find new PRPs. We don't know if we will need to issue a new demand letter or not.

Thanks,
Debbie (3-7632)

Peter & Deb:

The attached ICS represents costs through December 31, 2013 for the Nutronics site B5XR – which does not include ATSDR costs. Please let us know if you need a certified cost package and/or ATSDR costs for your possible demand letter.

Thanks,

Mike
